

## IMAGEPRINT BLACK for OSX

### Installing a Trial Version

1. Double-click **IMAGEPRINT\_Installer.dmg** in your downloads folder, then double-click the file **IMAGEPRINT Installer.pkg** to begin the installation.

If you receive an "Unknown Developer" warning, right click (or control click) the installer icon instead of double-clicking it and then choose OPEN from the context menu that appears.

2. Read the License Agreement, check the box for "I Agree", then click **Install**.
3. When prompted, enter your computer password, then click Continue.
4. Click **Launch IPSetup**.
5. Click **Add Printer**, then click **Continue** in the next window that appears.
6. Select the printer model that you wish to install from the drop down menu and click **Continue**.
7. Type in a name for the printer or use the provided default.
8. If this is the computer that will be communicating with the printer, choose **Yes (Host Computer)**. (In most cases, this is the proper selection.)

[For information on IMAGEPRINT remote client printing, please see chapter 2 of the IMAGEPRINT Manual.](#)

9. Click **Continue**.
10. *Depending on the printer, you will see one or more of the following three options:*
  - **System Printer**  
If you are presented with a list of installed system drivers, pick the one used by the printer you are installing.
  - **USB**
  - **Local Network**  
If the printer connection is via the network (Ethernet or Wifi), click **Local Network** and provide the IP Address of the printer. This must

be a static (unchanging) address.

In most cases you can determine the IP Address of the printer and set it to Static (sometimes called Manual or Panel) via its front menu panel. Check your printer manual for specific information.

11. Click **Done** to complete the printer configuration.
12. Close IPSetup by choosing **Quit** from the IPSetup menu at the top of the screen.
13. Choose to **Quit** to exit the installer, or choose **Launch** to get started with IMAGEPRINT BLACK right away.

Whenever you want to use IMAGEPRINT BLACK you can start it by going to Applications > IMAGEPRINT and double-clicking the IMAGEPRINT icon. You can also drag the IMAGEPRINT icon to your Macintosh Dock for faster access in the future.

## **RECOMMENDED**

Before you make your first print, we suggest you read through "Making your first print with IMAGEPRINT BLACK" located in your IMAGEPRINT folder.

## **Additional Documentation**

The complete IMAGEPRINT manual is a valuable reference for getting the most out of your software. You'll find a copy in the IMAGEPRINT folder (IMAGEPRINT Users Manual.pdf) or by choosing **Manual** from the IMAGEPRINT Help menu.
